APPLICANT : MATSUSHITA ELECTRIC IND CO LTD;

INVENTOR : NAKADA SEIICHI;

INT.CL. : D06F 81/02 D06F 81/14

TITLE : ELECTRIC IRON

ABSTRACT : PURPOSE: To obtain an electric iron base for the pressing work to smooth creases of clothes, in which the working base and the cover can easily be replaced and the positional slipping out can be prevented.

CONSTITUTION: A working table 3 is detachably fitted to a support table 1. The cover 7 attached to this working table 3 can be independently separated from the support table 1, and hence, the cover 7 can easily be replaced. A pressing part 10 protruding upward is provided to coincide to the recessed part 4 of the support or 5 at the upper face of the support table. As a result, the cover 7 is pressed in the recession 4 and is more strongly fitted when the working table 3 is placed on the support table 1.
